Area and Vineyards

The village of Zell is located on the Mosel River midway between the French border and the town of Koblenz. This is the most famous wine from this Village and is recognized worldwide as the "Black Cat" wine. The Mosel area is also well known for its slaty soil, which serves the vines in a unique way: storing the heat of the sun during the day and supplying it back to the vines at night, stimulating the growth in a natural way. The harmonious climate, warm summers and mild winters are typical for this growing area.

Aroma/Taste

This medium bodied wine is light, crisp and refreshing. With perfect balance allowing for a clean mouth feel. Serve lightly chilled and enjoy it with lighter style foods or simply by itself.
